TOPICS OF THE TIME.

THE Supreme Court of Vermont has

decided that a man traveling in that

State on Sunday without excuse cannot

maintain an action against a town for

any damage he may suffer through defects

in its highways. This accords with the

decisions in Maine and Massachusetts,

but conflicts with the decision of the

Wisconsin court on a similar point.

It would appear that the statement

that Donaldson's children are in desti-

tute circumstances is untrue. Mr. James

Keeler, of Rochester, New York, who has

been appointed their guardian, finds

that Donaldson's property will pay them

an annual income of several hundred

dollars—enough, in fact, if properly

managed, to rear and educate them quite

well.

The number of travelers between

France and England via Calais and

Dover, during the month of August, was

twenty-eight thousand two hundred

and sixty-four. The first eight months of

the present year show a total of one hun-

dred and thirty-nine thousand five hun-

dred and seventy-six, being an increase of

three thousand eight hundred and three

over the corresponding period of 1874.

The United States are to have an im-

perial visitor next year—the emperor of

Brazil, Don Pedro II. de Alcantara. He

has secured the consent of his parlia-

ment to an absence of eighteen months

in Europe and the United States. He

will go to Europe, and then, returning

to America, will attend our centennial ce-

lebration and become certainly not the

least of the many sensations which the

next year bids fair to have in store for us.

It does not appear that the revolution

in the Turkish provinces is abating. The

address of the Servian parliament—its

official name is the Skupstchina—ex-

presses sympathy for the Herzegovinians,

and proffers to Prince Milan all means

necessary to restore peace to the provinces

in open revolt. An armed neutrality is

apt to be a prelude to open war, and such

neutrality as Serbia maintains will be

underarms; indeed, is so already, for its

troops are marching to the frontier.

CHICAGO, the largest grain market in

the world, handles about 90,000,000 bushels

annually, and has now in operation eight

steam elevators, with a capacity of

15,350,000 bushels, or more than the av-

erage product of 1,000,000 acres of the

fertile wheat-producing lands of the con-

tinent. Their capacity varies from 200,-

000 bushels to 1,500,000. The entire cost

of the eighteen elevators now in opera-

tion was about \$5,000,000, exclusive of

the cost of the grounds on which they stand.

A NOTED negro, "Jack" Campbell by

name, has just died at Madison, Georgia,

aged eighty years. His reputation as a

humorist extended throughout the State

of Georgia and lasted for many years.

He was a slave, owned by an inn-keeper

at Madison, and brought great prosperity

to the establishment with which he was

connected. His name appears in the

"Statistics of Georgia," and "Major

Jones' Courtship," and many of his jokes

and witty sayings have appeared in the

publication of the *Harper's*. At one time

Mr. P. T. Barnum offered the owner of

Jack the sum of ten thousand dollars for

him.

PROFESSOR CLELAND, in his address to

the British Association, says that he is

convinced of a unity of plan running

through animal forms, and reaching, so

far as the main line is concerned, its

completion in the human body. There

is evidence that animal life has reached

its pre-ordained climax in humanity, and

it cannot be thought that, as myriads of

years roll on, descendants differing totally

from man will be developed. In the na-

ture of the variations in the human race

there seems to be some evidence that

the progress of evolution is not to be traced

from man, and to other animal forms yet

to appear, but, through his physical na-

ture, into the land of the unseen.

The Princess Domencia Ciarelli was

left a widow with two sons, and the elder

died. Almost crazy with sorrow, the

Princess was ready to fight the men who

brought the coffin, and protested they

should not carry away the boy. In the

interval of calm the young brother, left

alone with the body and the coffin, re-

solved to cheat the men and help his

mother to keep Domencia. He hid the

corse in a closet and got in the coffin

himself. He was carried to the church

without discovery; but at the church,

nearly suffocated, he groaned, and the

coffin was opened, but he died in a little

while. Now the mother is dead. All this

in Paris only the other day.

DESCRIBING what John Bull drinks

Mr. Horace White says excessive moisture

and a cold climate are more convenient

than philosophical as reasons to explain

why the Englishman is addicted to

sherry, brandy and stout, while the

Frenchman, German and Italian are con-

tent with sweetened water, light wines

and thin beer. In America it is thought

that drinking seems to be rather per-

functionary than enjoyable, rather in the

STANFORD, KY.

Friday Morning, October 15, 1876.

W. P. Walton, Editor and Proprietor.
T. R. Walton, Jr., Business Manager.

Ohio Election.

The defeat of Allen in Ohio by a combination of all parties, aided by the money power of the North, and the banks and bankers of the whole country, is really not much of a surprise to any one. It was an unequal conflict. On the one side was arrayed the true members of the Democratic party, who were fighting a battle for the poor laboring men, while on the other side the "bloated bond-holders" with their teeming millions, the wealthy nabobs of the land, aided by all the money kings of the land, were struggling to make the rich richer and the poor poorer. It was a fight of capital against labor—and they have won. In no sense can it be called a Radical victory, because that party had the help of many hundreds of Democrats who voted with them solely on the ground of "expediency," and because they disagreed with their party on the currency question. This was a most unfortunate issue. The Ohio Democracy acted unwisely in putting such a plank in their platform. A State Convention was not the proper accession for it. It should have been left to the coming National Convention for action. The Radicals moreover, were greatly aided by Mr. Schurz, a Liberal, who is not a Republican. Thousands of Germans voted with them because he, Schurz, told them to do it, but no one will deny that more than half of the Germans who voted that way, are Democrats who would vote for a Democratic candidate for the Presidency. The result in Ohio proves that in 1876, we are to have new issues. Old things are passing away, and behold, new things are taking their place. The old party lines are fast being obliterated, and there will be new parties formed for the contest in the near future. Whatever may be done, we trust, yet with considerable misgivings and fears, that such principles will prevail as to give the greatest good to the greatest number.

National Cemeteries.

We conversed with Mr. J. W. Angus, the contractor who has the building of five of the National Cemeteries, the other day. One of them is located at Mill Springs, one at Camp Nelson, Pittsburgh Landing, and two at other points. They will all be finished in the course of a few weeks. They are built of brick and stone, have six rooms each, and cellars, are of modern architecture and are models of comfort and convenience—and cost \$4,600 each, all being built alike.—There is an acre of ground attached to the house, and from ten to twenty acres for Cemetery purposes, enclosed with a neat stone fence about 4 and a half feet high. Each grave is to have a marble slab, with the name of the person buried, when known. This section house is occupied by a wounded or crippled Union soldier, generally, who receives \$75 per month, and house rent free, and is also furnished with a mule, cart, and driver, free.—It is his duty to keep the Cemetery and ground neatly set in grass and mowed off every month in the growing season. This is a fat position for the Sexton, and all the money to build and keep them up perpetually, comes out of the pockets of a sorely taxed people.

Mr. Angus says there are about 3,000 graves at Mill Springs. The sum required to buy that number of marble slabs, engraved, and shipped and placed, would build a neat school house in half of the counties in the State. We consider it a foolish expenditure of the people's money, by the Radical party. We are not opposed to having a neat Cemetery, enclosed with a stone fence, and having it kept clear of filth, but build those houses and keep a Sexton and assistant there perpetually, at a cost of at least \$4,000 per year, is needless extravagance. No one can go further than we to honor our dead soldiers up on both sides; but we oppose giving them more than we do our own other dead or our living friends. Thousands of soldiers of the Union Army lie scattered all over the States, in unmarked and unnumbered graves. Why should they receive less attention than the others. Thousands of Confederate soldiers are gathered in other places, but no public "National Cemetery" is kept up; and the Southern people are compelled to aid perpetually in the support of these National burial places, to the neglect of their own dead. Is this right, is it just, is it equitable? Let the unbiased part of the public judge. Even though it were true—that no discrimination was made in gathering up the dead of the two armies, and placing these things around them alike, still the useless expenditure should be condemned. Where sleep the dead of Mexico and those who fell on other battle fields? It is a "new departure," this building of National Cemeteries. We trust that when the Democratic party comes in to power, a law will be passed compelling these Sextons to pay a proper rental for the use of the house and grounds, and that their salary will not be given. Retrenchment and reform should be the aim of our government, not extravagance and corruption.

INSURANCE FRAUDS.—A prominent London insurance journal condemns in severe terms the practice of many English fire and life insurance companies of stating their assets to be greater than they really are, by adding their "authorized capital" to the sum of their "paid up" capital, thus virtually perpetrating a fraud upon the public. Moreover, they add the sum of their life company assets to that of the fire department, thus impressing the public with the belief that their assets are greater than they really are, which is a fraud likewise. The London journal referred to cites several companies as examples—one of which is in Canada. It asserts that a noted London company authorizes its agents in this country and in England to put out signs over their agencies over which is printed in large, bright letters—"Assets, \$10,000,000, Gold," when in fact the true sum of its assets is less than one-fourth that amount. The capital of the life department cannot be touched to pay any loss by fire in the fire department, and vice versa, and to add the capital of the two in making out their annual statement, as if it represented only the capital of one, is a direct fraud upon the public. The paper making the above statements says the practice is wrong and that it is the duty of the press everywhere to expose and ventilate the fraud. To the end that a stop may be put to it.

MR. ISAAC CALDWELL, a Louisville lawyer has been spoken of as a candidate for the U. S. Senate. There are now about six aspirants for the place. We heard a well-known Democratic politician of Washington City say that the Legislature of Kentucky would commit a serious blunder and omit an obvious duty by failing to send Hon. James B. Beck to the Senate; and gave as his reasons that Mr. Beck is regarded at the Capital as the best posted politician in the State, and understood all the frauds of the Radicals and how to circumvent them, that the Radical leaders feared and respected him, but they had rather see any other of the six aspirants in the seat, on account of their lack of such information as would expose their nefarious designs.

THE great grape vine of Santa Barbara, California, having become in a decaying condition, has been taken up and made into sections and will be shipped to the Centennial for exhibition. It is the largest vine in the world, and has borne, for sixty years, several thousand pounds of fruit of the Mission variety annually. When packed it will weigh several tons. It is forty inches in circumference, three feet from the ground, and when in full bearing the branches covered ten thousand square feet. California beats the world for big trees, big vines, and big banks.

OUT of 300 men whom Stanley took with him into the wilds of Africa, 154 died of the disease which prevailed there at the time. He is a brave explorer, and it is hoped that he will survive to tell the tale of his explorations. During his journey into the Interior, he had to fight his way step by step in some parts, but always came out victorious. It is to be hoped that this expedition, undertaken under so many difficulties and dangers, will be sufficiently successful to enable the bold hero to add much to the geography of the country.

WE learn that Andy Conn shot John Arnold on Monday last, at Ed. Todd's grocery, in Madison county. It is said that Conn shot Arnold because Arnold slapped an old man named Smith in the face. This is all we can learn in the case. It is said that this is the third man that Conn has shot. We have heard of no arrests, so far. It is a little strange that Conn can go on in his killing—from time to time—and yet escape punishment.—The blood of his victims cry out from the ground, for his punishment.

ON his trip from Denver westward, the special train which was carrying Pres. Grant and his party ran at the rate of 45 miles per hour. The superintendent thought the speed was too great for safety, and desired the train to slacken its run, but Grant would not consent to it. Perhaps, in view of the fact that he is a "dead duck" on the third term question, he wanted to commit suicide. That superintendent ought to have increased the speed rather than slacken it.

IOWA AND NEBRASKA.—These two States held elections on Tuesday last, and went very decidedly Radical, there being a majority of about 35,000 in Iowa, and 10,000 in Nebraska. No one will wonder at this result. They have been hot beds of Radicalism all the time; people as they are by those who were raised in fanatical New England. The currency question did not cut any figure in either State, as both parties were in favor of hard money.

PROF. TICE has guessed correctly again. He predicted severe frost over the 9th to 13th of this month. It was so cold on Monday night last that milk froze over the surface in these parts, which is an extraordinary occurrence at this time of year.

The President of a colored fair association in Montgomery county got all the funds which were taken in at their recent exhibition and departed "where the woodbine twines."

REVIVALS.—Moody and Sankey—the well-known revivalists, who started England, Ireland and Scotland for their efforts in behalf of the Christian religion, have concluded to begin a work in this country, with the hope of doing some good. Chicago, New York, Brooklyn, and other cities, have offered to furnish them with commodious houses in which to hold their meetings. It is to be hoped that wherever they may go, the people will give them audience.

THE Huntington bank robber who was arrested in Fentress county, Tenn., recently, was taken back to Huntington and lodged in jail. The question yet remains an open one as to who the robbers really are. The matter is being discussed in Missouri and in this State, but no conclusion has been arrived at, certainly. The idea of resurrecting the dead one at Pine Hill, for the purpose of identifying him, is quite absurd.

THE Patrons of Husbandry are making extensive preparations to be represented at the Philadelphia Centennial. A sixty acre tract of land will be provided a short distance from the city on a railroad, and it will be supplied with booths, tents, etc., and this exhibition of the farming interests of our country will prove to be one of the most attractive of the great exposition.

SUCH was the strain of work upon the engineer who "drove" the first fast mail train from New York to Chicago, that he fainted immediately upon stopping the train at its destination. For over 200 miles the train did not make a stop, running at the rate of forty-one miles an hour, and taking in the mail as it ran, by means of a contrivance invented for that purpose.

MR. JOHN CURRY MILLER, author of a "National" song titled "Grand Columbia," is certainly the coming bard. "Hail Columbia," will be so where, comparatively. It is said that some one or more, perhaps, of our members of Congress will introduce a resolution of thanks to Mr. Miller for his magnificent poetical production. It should be done by all means.

THE Grand Lodge of Good Templars in Kentucky met in Louisville, last Tuesday. There was a large delegation of members on the first day. Rev. Green Clay Smith, of Frankfort, one of the most earnest workers in the cause, was not able to be present, on account of sickness, although he had gone to Louisville to aid in the meeting.

THE sufferers by the great flood at Indianola, Texas, have been fully provided for by a generous public from all parts of the country, and the relief committee reports that no further aid is required, and heartfelt thanks are tendered all of the generous donors. "One touch of nature makes the whole world kin."

THE tobacco planters in Southern Kentucky, through the influence of the Grangers, have decided that they will, hereafter, demand \$5 pay for each tobacco hoghead, and pay for the ten pounds of tobacco taken from them as a sample by the warehouse inspectors. This is precisely right.

ALBERT FINK, for eighteen years connected with the L. & N. R.—since his resignation of the position has accepted the General Agency of an Association of Southern railroads. We learn this from the *Courier-Journal*.

HON. ALEXANDER H. STEPHENS is said to be very sick at Augusta, Georgia—and hence cannot deliver the two speeches which he promised to make at Chicago, Illinois, during the Fall and Winter months.

THOMAS JEFFERSON RANDOLPH, the only grandson of Thomas Jefferson, died at his home in Charlottesville, Va., on Thursday last, in the 80th year of his age.

LOCAL NOTICES.

A Big Stock of Goods at Severance & Miller's.

Those indebted to B. Hon & Stag will please call and settle.

For Bargains in Boots and Shoes go to the New York Store.

20 Tons Bran for sale at the Stanford Mills. B. MATTINGLY & CO.

Tevis has a full line of Hats and Caps of all possible styles, sizes and prices.

Cloaks in the latest styles in the Parlor Millinery Establishment of John H. Craig.

For Style and Fashion go to the Parlor Millinery Establishment of John H. Craig.

A New lot of Furniture and Carpets just received at Hayden Bros.—all at low figures.

Just received at the New York Store, a large assortment of Blankets, Coverlets, and Comforts.

Tevis has done up Overcoats of all kinds and prices. Beaver, Cloth, Melton, &c.—cheap.

Tevis has a full stock of Fall and Winter Clothing, and he will be surprised to see how cheap he will sell a suit.

Tevis keeps those superb Box-Toed Shoes for Men and Children. They are the prettiest and most durable shoe made.

For a nice, stylish suit of Ready-Made clothing for men and boys, go to the New York Store, opposite Myers House.

A COMPLETE assortment of Hats and Caps, selling off at low prices, at the New York Store. A rare chance for bargains.

The gentlemen are especially invited to call and examine the mammoth stock of Boots, Shoes, and Clothing at Hayden Bros.

Tevis has all kinds of Furnishing Goods. You can scarcely call for anything in the furnishing goods line that he has not on sale.

Tevis has a very large lot of Winter Boots and Shoes—not cheap shop work—but made of real leather, and in the best manner.

GRAND opening of Millinery Goods at John H. Craig's Trade Palace Cash Store, on Friday and Saturday, Oct. 15th and 16th. All are invited.

If you want to save money in buying your Dry Goods, Clothing, Boots and Shoes, Hats and Caps, Trunks, &c., go to the New York Store.

Go to the Parlor Millinery Department in John H. Craig's Trade Palace Cash Store for stylish Hats, elegant Bonnets, and the latest Novelties.

WEAVER & McALISTER have ten bags of strictly choice old Rio Coffee bought before the late advance—which they will sell at advance at old prices.

SEVERANCE & MILLER offer inducements in all staple lines of goods, and grade their margins unusually low on every class of goods which they have in stock.

SEVERANCE & MILLER have just received a very choice Stock of Dry Goods, Notions, Clothing, Boots, Shoes, Hats, &c., to which they ask the attention of purchasers.

If you will call in at Tevis' great Clothing Emporium and Furnishing Goods House, you would find the most complete assortment you ever saw, outside of Louisville, in this State.

The largest and most complete stock of Dry Goods, Notions, White Goods, Dress Goods, &c., Shawls, &c., and every other fabric known, can be found at the store of Hayden Brothers.

WESTERN KING WILLIAMS, TALMAS and every style of Overcoats in Fur, Beaver, Chinilla, Equinax, Melton, and other desirable goods sold cheap at the great Clothing House of J. Winter & Co., Louisville.

The old patrons of Severance & Miller will please not suffer themselves led away from them by extravagant promises and a few baits, before giving their large Fall and Winter Stock an examination. No one can do better by you than they.

J. WINTER & CO., LOUISVILLE.—This old reliable House has this season a larger and better assortment in their "Merchant Tailor" Department than we have seen elsewhere. If you want a handsome suit at a reasonable price—give them your order.

NO EXCUSE FOR BEING SICK.—No person can use Boschee's German Syrup without getting immediate relief and cure. We have the first and best, Cough, Croup, Consumption, or any disease of the Throat and Lungs, yet to hear from that has not been cured. We have distributed every year, for three years, about 250,000 Bottles by Druggists in all parts of the United States. No other Manufacturer of Medicines ever gave their preparations such a large sale. Go to your Druggists, Bosh & Stage, and get a bottle for 75c, and try it.—Two doses will relieve you.—Sample Bottles, 10 cents each.

HERE are a few seasonable goods just received at Campbell & Miller's Eureka Supply Store, and offered very low for cash: Celery Salt, Salad Dressing, Gelatine, Lemon Acid, Yeast Powder, Tomato Catsup, Fancy Sauces, Pickles, Chow Chow, Mixed Pickles, Macaroni, Vermicelli, Pearl Barley, Hominy, Cracked Wheat, Navy Beans, Out Meal, Buckwheat Flour, Graham Tapioca, Sago, Flavoring Extracts, Citron, Lemon Peel, Currants, Prunes, Dates, Fancy Candies, Plain Candies, Raisins, Lemons, Oranges, Cocoanuts, Chocolate, Preserves, Jellies, Canned Fruits, Canned Vegetables, Apple Butter, Mince Meat, Cane Oysters, Sardines, Pige Feet, Dried Beef, Bologna Sausage, Tinned Tea, Black Tea, Crackers, Fresh Cakes, Cracknels, Mackerel, Molasses, Fine Syrup, Breakfast Bacon, Porkhouse Sausage.

HOME JOTTINGS.

THE drivers of the coaches between here and Somerset, report travel very light.

REV. T. A. BRACKEN will preach in the Presbyterian church here, next Sunday.

HON. M. J. DURHAM, our able Representative in Congress, was in town today.

Circuit court will begin here next Monday. A large crowd will be in attendance.

REV. R. M. CHENAUTY will preach at the Baptist church Sunday morning and night.

REV. GEO. O. BARNES will preach in the Court House next Sunday evening, at 3 o'clock.

W. C. OWENS, of the Somerset Reporter, called on us a few days since en route to Louisville.

THE rockaway presented to Rev. G. O. Barnes by a few of his warm personal friends and admirers, is a most beautiful and serviceable vehicle.

DIED.—On Wednesday last, at his father's, in Boyle county, J. Metcalf Bright, aged 7 years. The funeral services will be held at the residence of Mrs. Elizabeth Bright, to day, at 10 o'clock.

PERSONAL.—Mr. Otto Owens and his handsome bride, nee Miss Maudie Bove, of Richmond, Va., passed through town on Thursday last, en route to Somerset.

Our jail will be full of several of its inmates during the coming circuit court, and the Sheriff will be called upon to make his usual semi-annual visit to the Capital.

THERE is a school on an average for every four miles square in Lincoln county, and as many places of worship, where preaching is held at least half the time.

MISS MARY F. CHENEY, of Sardinia, Miss., who has been on a short visit to the Misses Alcorn, left on Monday last for Louisville, where she intends spending the Winter.

SWEET potatoes and possum afford a fine dinner dish at this season of the year, and not Daniel says he can furnish enough opossums to supply the town. Bring 'em in, Uncle Daniel.

PERSONAL.—Mr. Tom Miller and wife, of Marshall, Mo., are here on a visit to relatives. He reports fine crops in his State, of all kinds, yet times are quite dull, but the people hopeful.

The lame, the halt, and the blind, the poor, the rich and almost all other sorts of folks, presented claims for allowance before the Court of Claims which met on Monday and closed on Wednesday.

SEVERAL iron bridges will be erected on the Knoxville & Richmond Branch railroad, in place of the wooden kind which need repairs or replacement. The material passed through on the cars recently.

THE Corner of this county, J. M. Hiatt, has held three inquests the present year, namely: one Dr. De Strain, one of a negro infant, and the other on Mr. Matt Boyd. The perquisites of his office are meagre.

TOMACCO.—C. Cunningham, Tobaccoist, at Lancaster, Ky., wants you to patronize home manufacturers. He has the best twist and manufactured article, which he offers low to the trade. Send for a sample lot and try it once.

THE Central Kentucky Medical Association meets next Wednesday, 20th, in Stanford at 10 o'clock A. M. The opening paper on "Headaches," their causes and treatment, will be read by Dr. Hoffman, of Lancaster.

THE party of gentlemen who left here on the 4th of this month for a deer hunting and fishing spree, returned on the 10th, and report no deer killed but splendid fishing as they caught a large number of fine salmon, bass and perch.

A MORE accommodating livery man can't be found than our friend Jim Ed. Bruce—and his fast, gentle horses, for harness or saddle, and his clean, neat and easy riding vehicles—all at low prices, make his establishment a sine qua non to all needing them.

NOTICE.—The "Old Nines" will meet at their hall in Stanford to-morrow evening at 7 o'clock. A full attendance is requested, as business of much importance will come before the society. Every member should attend, in order to learn something to his advantage.

OUR physicians say that for the past six weeks they have been very busy waiting upon the afflicted, but now they have little to do. Only a few deaths have occurred and the mortality has been as little as in any year for the last decade. This bracing weather will bring all right again.

STANFORD BROS. have just received their stock of magnificent Fall and Winter goods is now open, and the display they make is very attractive. An inspection convinced us that every thing they offer is of the best quality, and their prices such as to enable the public to purchase goods as low as ever offered in any market.

As our Circuit Court is rapidly approaching, and the grand jury will soon be in session, we do not wonder that all of our dirt roads are being put in good repair. Some of them have been sadly out of fix for some time, and it is well that something has stirred up the parties to a performance of their duty.

In our Pulaski friends had spent \$10,000 of the money they used in building their new temple of justice, in the erection of a safe prison, they would have had a court house good enough for any county in the State, and no further taxation would be required to build a jail. So said a citizen of Somerset to a Journal reporter the other day.

MARRIED.—Mr. G. A. Peyton and Miss Lizzie Tevis were united in marriage on the 7th inst. Attendants—W. H. Murphy and Miss Alice Cash, Napoleon Tevis and Miss Bettie Peacock. May they live to celebrate their golden wedding; and may they be always as happy as our devil looked while eating the delicious cake sent by them to this office.

MR. ARCHIE C. SNOW, of our town, saw a large owl, of the "chicken eating breed," on the corner of a barn near the Court House last Monday morning, and, with his revolver shot the bird. Mr. Snow brought the bird down at the first shot, and, on actual measurement, he was five feet seven inches from "tip to tip." This is the largest owl that has been killed in this section for some years.

IT seems strange that the old record books of our county of Lincoln should present such clear writing as they do. Here, in the county clerk's office, are records one hundred years old nearly, which were written only a few short years after Boone and his companions blazed a pathway across the trackless wilderness, which shone like a gleam of light through the darkness penetrated. Yet the deeds and other "testaments" are as clear as though written yesterday. The paper upon which they are recorded is almost as thick and substantial as parchment, and the chirography is excellent. From present appearances they are good for centuries to come.

ONE hundred years ago, the grounds which now form Lincoln county, was an immense cane-brake, with cane at least twenty feet high. It was the home of the buffalo, deer, elk, and other wild animals. Not far from our suburbs, there is a buffalo trace over which (as we have been informed by old residents, who gathered the fact from their forefathers) these animals passed from the hill part of this county to the springs and branches which flow within a mile of Stanford. Buffalo Spring, the site of Rout's Mill, took its name from this trace, and we are told that the old Presbyterian church here derived its name from the same, and it stood within 100 yards of the trace.

THE colored people who have made settlements out in the country, instead of making them around town, have acted wisely. There is one on top of Hill's Gap, and one about two miles from town. At these points the colored people can procure wood almost for the cutting, while those who live about town can scarcely afford to buy enough to keep them from freezing in the Winter. Those who live in the country act wisely.

TWO prisoners passed through town last Saturday in charge of the Sheriff of Pulaski county, en route to the penitentiary for a period of two years. Two other prisoners were brought here by him and lodged in our jail for safe keeping, until the next term of the Pulaski circuit court, owing to the fact that the jail down there is but a little better than an ordinary house, as a prison. Pulaski county has purchased an iron cell, however, which will be placed in the old jail when finished.

A YOUNG couple, fresh from the mountains of East Tennessee, passed through our town on Wednesday last, on foot, destined for the Western Plains. They informed those who conversed with them that they had married on last Monday a week since, and they were satisfied they could do better in a country where corn grew higher than four feet, and produced more than two barrels to the acre. The young man said he knew the world owed him a living, and his better half said she was willing to help him get it.

LAND, STOCK, AND CROP ITEMS.

LIVE stock trade improving, especially cattle.

THE fine stallion Allie West, which sold for \$15,000 a few days since, has the epitome in a mild form.

WE heard a citizen of a neighboring county say that he very much desired to buy a small farm of 50 or 60 acres of land in this county, near town. If any of our readers have such for sale, they would do well to advertise the fact in this paper.

THE greatest short horn sale that ever occurred in this country took place last Thursday in Clark county, Ky., near Winchester, by B. B. Groom. Seventy head of heifers and twenty bulls were sold. We will lay before our readers next week a statement of the result, written for us expressly by an intelligent stock farmer who was present.

FIRM TOBACCO.—Mr. W. J. Russell, one of our most enterprising farmers of the West End, showed us on Monday last some excellent samples of tobacco raised by him this year. They were cured a bright yellow, so desirable among Tobaccoists for wrappers. Mr. Russell has ten acres of this tobacco that he says will fully come to the samples—if so he has a "Big Bonanza."

SEVERAL of our Hanging Fork farmers told us on Monday last that a great deal of the corn crop would remain uncut in several parts of the county, owing to the fact that farmers could not afford to pay for cutting it, with corn at \$1.25 to \$1.50 per barrel, and that the fodder would scarcely pay for the cutting. We have not heard of any corn being injured by the late severe frosts, and farmers say this is fine weather on the crop, as it hardens it ready for Winter and for grinding.

A NUMBER of our readers have told us that their fowls, both chickens and turkeys, have died with cholera within the last two months. We have learned from our friends that a duck has never been known to have that disease. The aquatic habits of this fowl may account for its freedom from the complaint, and this may teach us a lesson. Water cleans them, and if we could keep our roosting places clean, our other fowls might escape. An old lady subscriber told us the other day that if a little coal oil was mixed with meal and that fed to the fowls, it would prevent if not cure the cholera.

THE Courier-Journal reports sales at Lexington on October 15th, of short horns belonging to Messrs. Vanmeter and Farra as follows: Fifty-three head brought \$5,865, an average of only a little over \$110 per head. The highest priced animals were Gem 2d, by Dixie Taylor, dam Gem 2d, by Fordham Duke, sold to Vanmeter at \$510 Gem 5th by 13th Duke of Adriaesdam dam to Dr. Sprague, \$425; Queen of the Realm, by Star of the Realm, dam by Prince Christian, to Grigsby, \$385; Gem 4th, by Alvin Duke, dam by Jeff. Davis, to S. Vanmeter, \$350; Corn 3d, by Duke of Argyle, dam by Sexton, to Dr. Sprague, \$280. For ty dollars was the lowest price brought.—The sale was poorly attended, and the prices obtained were quite moderate considering the quality of the stock, as the Vanmeter herd is known to be among the best in Kentucky.

COUNTY COURT DAY.—Considering the wet, raw day, there was a good crowd in town last Monday, owing to the fact that it was the opening day of the Court of Claims. From the report of the auctioneers below, it will be seen what stock was on the market, and the prices obtained. Times are represented rather easier than some months past, and a general good feeling prevailed among all classes, trades and professions. In the County Court but little business was docketed outside of administrators and guardian settlements. We noticed Mr. John Blain, County Clerk, at his old desk again, after a long absence, by reason of a partial stroke of paralysis. A pass word, private, was granted to James Robinson over the lands of Mr. Swope, after a spirited opposition upon the part of the latter. But for the existence of the statute which allows the erection of these passers, under proper circumstances, many persons would be greatly inconvenienced. By 5 o'clock in the evening the crowd in town had left for their respective homes, not one being left to tell the tale that John Barleycorn had been largely patronized.

CAPT. H. T. BUSH, auctioneer, reports a tolerably fair trade. About 250 cattle on the market, mostly poor. Oxen sold from \$50 to \$120 a pair; common feeding cattle sold from 3c to 3 1/2c; milk cows from \$30 to \$40; dry cows 3c to 4c per lb; broke mules sold from \$75 to \$120; 9 2-year old mules were withdrawn at \$72 50 per head horses sold from \$50 to \$140.

CAPE J. M. HIGGINS reports about 150 cattle on the market, of mixed lots. Prices fair for those sold, and bidding spirited. The following was sold by him: 1 cow and calf \$35; 50 hammers, \$20 50 per head; 4 hammers, \$18 40 per head. Several yoke of cattle from \$65 to \$165 per yoke. 8 calves, common, \$10 per head. 3 calves, \$16 per head. 1 horse \$40, 1 work mule \$100. 3 calves, common, \$11 90 per head. 5 hammers \$17 00 per head. 1 steer \$85. 1 buggy mare \$135.

C. R. R. ITEMS.

MR. M. W. VENABLE, Resident Engineer, has been placed in charge of King's Mountain Tunnel.

CARR. J. S. MORRISON, the untiring and able Division Engineer on the road between Shelby City and Somerset, was in Stanford for the second time in the last ten months, on Thursday last, and made us a call. Capt. Morrison certainly sticks close to his work, the result of which is that his division is much further advanced than any on the line.

THE many friends of that obliging gentleman, Maj. C. E. Webster, will rejoice with us at his promotion to the staff of the Chief Engineer, with office at Cincinnati. Major Webster is an Engineer of remarkable skill and ability, as the energy with which he has pushed King's Mountain Tunnel attests, and the compliment that Mr. Lovett pays him in thus promoting him, is but a just tribute to a most deserving officer.

LINCOLN COUNTY NEWS.

Huntsville.

WE are in receipt of liberal predictions of Winter. The frosts of the last few nights are rapidly bringing down the leaves of the forests. Corn has made its escape, and is an unusually heavy crop. The work of sowing grain is going forward on every side. The few logs—and they are very few—are becoming fast. Mule colts hang their nether lips and look disconsolate, as if they were aware of the fact that they are no longer a power in the land. Calves, on the contrary, whisk their tails in proud recognition of their paroxysmal importance.

THE merchants are busy unpacking and displaying their autumnal purchases. The Milliners and Mantua makers are eloquent on "loves of hats," and "heavenly dresses." Pappas, of course, look grim, and mothers profoundly study each new effect.

By the way, we understand that on Friday of last week, the lady Principal of a flourishing Female school in the East end of the county, delivered for her pupils a telling lecture on the subject of "pin backs."—On Monday morning, while waiting for the train, we had the pleasure of seeing near a hundred pupils assembled at the foot of the rail, and not a pin back there. The sight was refreshing, enrapturing, entrancing; and as we beheld the smiling Principal receiving each new accession at the door, we found ourselves unconsciously singing—

"Let the good Angels come in."

MR. BEN HOFFMAN, formerly of your place, and late of Cincinnati, died on Sunday, at the home of his brother-in-law, J. W. Hooker. He was buried in the Cemetery Monday afternoon. Mr. H. was long an invalid. His young wife was supported through the trying ceremony by a large assembly of relatives and friends.

WE learn that the store house, with all its contents, of Mr. Wm. Spraggins, on the Rolling Fork, in Casey county, was burned on Saturday night. Loss total—said to be about \$4,000—no insurance.

FALSTAFF.

GARRARD COUNTY NEWS.

Lancaster.

WE are glad to note the return of our friend Matt Walton, who after an absence of three weeks has returned to his field of labor.

THE protracted meeting at the Christian church, conducted by Rev. R. A. Gao, is drawing large crowds, and there has been several additions up to this time. The meeting is held only at night, and will be continued through this week.

A LARGE rattlesnake with ten rattles and a button, was killed by some boys on the Gab Orchard pike about two miles from town about a week ago. His snakeship was undoubtedly a wayfarer from home, as it is something remarkable for one to be found so close to Lancaster.

ON Monday evening at Ed. Todd's grocery in Madison county, Andy Conn shot and killed John Arnold. We have not heard the particulars of the killing.

DIED.—At her residence in this county near Lowell, Mrs. Ann Eyston. The funeral was preached at the house and her remains brought and interred in the Lancaster Cemetery.

THE October term of our Circuit Court, especially for equity business, is now in session, and will continue through the week. The great case of Washington county vs. the Cumberland & Ohio railroad will be argued, and probably some steps taken in it at this term. Messrs. G. K. McKee, Capt. Ed. Russell are here in the interest of Washington county, and Mr. Burr Harrison is representing the railroad. SPEED.

EDUCATIONAL.

TARRANT

College for Young Ladies,

On the Knoxville Branch of the L. & N. R. R.,

Crab Orchard, Ky.

Term Will Begin September 6th.

\$175, if Paid in Advance, Will Defray Expenses

Of Board, Fuel, Lights, Washing, Tuition in Literature, Department, Contingent Fee, and Library Fee for the entire session—Term of Forty Weeks. THE CELEBRATED "BUFFALO"

STEAM GRIST MILLS!

I have renovated from bottom to top the above well known and celebrated Steam Mills, situated in Lincoln county, about one mile from Stanford, on the Huntsville pike. The accomplished Millwright William N. Putts, of Madison county did the work, and he now pronounces them "made as good as any on the Continent." All the old machinery and fixtures have been taken out and new put in—Bones, new Saut Mill, Bo

4

FOURTY YEARS AGO.

BY SEPTIMUS SANFORD.

How wonderful are the changes, Jim. Since forty years ago, when those were wooden doors, Jim. And boys were pants of wool. When shoes were made of calfskin. And socks of homespun wool. And children did a half-day's work before the hour of school.

The girls took lessons, Jim. Upon the spinning-wheel. And practiced later, early, Jim. On spindles, with, and not. The boys would ride horses to kill a dozen miles or so. And hurry off before 'twas day. Some forty years ago.

The people rode to meeting, Jim. To dress instead of sleighs. And wagons rode as easy, Jim. As loggins once-a-days. And not answered well for teams. Though now they be it too slow. For people lived not half so long. Some forty years ago.

O, well, do I remember, Jim. The Wilson patent stove. That father bought and paid for, Jim. To clothe our girls and boys. And how the neighbors wondered. When we got the thing to go. They said 'twould melt and kill us all. Some forty years ago.

Yes, everything is different, Jim. From what it used to be. For men are always tampering, Jim. With God's great natural laws. But what on earth we're coming to—Does anybody know? For everything has changed so much. Some forty years ago.

LOST IN THE NEWERS.

(Broken Series.)

Wishing to do the things below the surface of the earth, we entered Hudson avenue sewer, the other evening. A cousin from the country, who had previously been taken over the proposed route, agreed to open the man-hole corner of DeKalb avenue. On entering the sewer, which is the largest in the city, I found the slush, which was backed in by the tide, up to my arm pits. Being clothed in a rubber suit, this did not affect me, any more than making walking-laborious. By the light of a small bull's eye lantern, I was enabled to see about thirty feet ahead. The sewer is large enough to drive a buggy through, being about eight feet deep, and seven wide. The bottom of the sewer is covered with a greasy substance, which made it difficult for me to keep my feet. I did take a few involuntary dives into the slushy stream, before I got accustomed to the walking. And which dives, were it not for a bottle of ammonia, I would have died from inhaling the noxious gases, arising from decayed vegetables, and all imaginable kinds of muckulent substances; even dead animals found there way here. I had heard that the sewer was infested with huge rats, but as yet I had seen none. Being enclosed on all sides, the place was very warm; the perspiration rolled off my body, as if I were in a Turkish bath.

I was cogitating upon things of the upper world, when I felt coming large strike my knee. I reached down and raised it. Horror of horrors; it was the body of a man. Involuntarily I allowed it to fall from my grasp. Curiosity getting the better of me I again raised it. The body must have been in the water some time, as putrefaction had set in. The body was dressed in a gray frock coat, white vest, and black cassimere pants; the shoes and hat were gone. The man looked to have been forty-five years of age, as near as I could make out by the light of the lantern, his hair and luxuriant whiskers were auburn colored. In the upper pocket of his vest was an envelope containing a short note written in French, which on being translated read:

LOUISE—It could not have been otherwise. Without your life was unendurable. If God forgives those who do away with themselves, I forgive you, I forgive you. Loved one, when this reaches you, I shall be food for the fishes.

Your friend who loves you better than life. GUSTAVE MEROUX.

While I was deciphering the writing the body floated down toward the river. I looked for it, intending to put the letter back, so that when the body would be picked up, it might establish its identity. The man had committed suicide, and the tide, which reaches as far as Myrtle avenue, had washed it in here.

Such a sight was not apt to lend courage to one enclosed by brick walls forty feet below the surface of the earth. The tide going out, carrying with it the slush and filth, made the walking easy. On reaching the corner of Myrtle avenue I saw a hole of rats. I heard that they were as numerous as if a visitor was an everyday occurrence; they were the largest rats I had ever seen, dark brown fellows with white breasts and very long tails. I carried a hickory stick in my hand, and with this I charged them; instead of running away, they ran at me; one big fellow tried to bite my leg but he could not make any impression because of my heavy rubber boots.

I drew my pocket pistol, a small Smith & Wesson, and fired amongst them. If a one hundred ton charge of blasting powder was fired, it would not make a greater sound than my pistol did in the sewer. The rats scampered off, and I was as much frightened as they. When I reached, as I thought, the corner of DeKalb avenue, the man-hole was not open. Could it be that my friend had deserted me, or lost his way? My watch denoted half-past twelve, a full hour and a half since I had left the corner of Plymouth street. I stood there for a few moments, but the man-hole still remained closed. While standing there I heard the sound of voices. My heart fluttered, I thought it was Bob come to let me out. The voices seemed nearer. Looking to my right, I am sure I saw two men walking in the sewer, one of them carrying a small stable lantern.

I turned the shade of my lantern and crept toward them. Before I had gone ten yards they had vanished.

Thinking they had turned down aside sewer I quickened my pace to where I saw them standing. When I reached there I observed a ray of light, seemingly from above. As I looked upward I caught a second's glimpse of the star-studded heavens, then the sphere of iron fell into its place. I again took up my post and awaited the coming of my friend. One, two, three o'clock, and no Bob. I then thought perhaps I might find an opening, and I again started through the sewers.

I turned to my right and walked a few blocks. At once, as I was passing, a flood of dirty water was ejected from a house-pipe, striking me in the face. I was tired and sick, my body was bathed in perspiration, and it was with difficulty I made my way. I almost wished it would rain and put an end to my tortures.

I had lost my bottle of ammonia, and

FARM AND FIRESIDE.

THE BEST LAYERS.—The advantage of the poultry and egg department of the farm was presented in a strong light by the Secretary of a New Hampshire Agricultural Society. The revenue from this branch of farming was said to exceed that derived from the potato product of the State. A bushel of corn produced nine pounds of eggs. The amount of the product of a bushel of corn fed to hens for eggs was nine dozen. The manure from the perch was equivalent to guano, pound for pound, and would pay well for attendance of hens. The Secretary said this industry would furnish profitable employment for men too infirm for field labor, and for woman's active hands and busy mind. For the egg department, the non-sitters recommended were: Leghorns, Houdans and Black Spanish. Good layers were marked by single combs. Good broilers were found in other breeds, but their product was small. The different varieties of hens, by experiment, were found to lay the following number of eggs yearly: Dunghills, 120; Brahmas, 240; Black Spanish, 120 to 160; Leghorns, 200; Hamburgs, 240; Houdans, 250. The Secretary would feed moist food in the morning and dry at night. The liability to disease should be prevented, as it might be in a great degree, by care and attention.

INDIGESTION IN HORSES.—M. Pety, a French veterinary surgeon, draws attention to the liability of horses and cattle suffering from indigestion from the consumption of forage in a humid or musty state. It is from over-feeding that the complaint is ordinarily produced, or to the rapid transition from dry, unlimited green food. Another very common cause is the putting of animals to work immediately after their feed. The giving of chaff and the refuse of the threshing machine is also another principal source, as well as excessively cold water, and, above all, allowing the animal to drink the water of marshes. A little salt or handful of meal is excellent in the drinks. Old animals ought never to be given too much food at once, and it should ever be mixed with a little straw. When the horse shows symptoms of indigestion, restlessness, suddenly refusing food, resting on one leg, then on another, the head drooping and seeking the left flank, its excrement either hard or liquid, etc., an excitant, as three ounces of kitchen salt or a glass of gin in a bottle of water, will afford relief; or an infusion of chamomile and sage. In case pain exists, two spoonfuls of laudanum will prove excellent. Of course, soap injections, friction and fumigation, are not to be overlooked. Bleeding, in case of grain indigestion, becomes mortal.

SHEEP AS ENRICHERS.—H. G. Abbott writes to the Germantown Telegraph: In 1865 I had a field of ten acres that had been mowed some ten years in succession without the particle of dressing put upon it; the grass had completely died out, and nothing was to be seen but white weed and yellow weed, or butter-cup and ox-eyed daisy. The soil was a clayey loam canting a little to the south and west, was in the smoothest possible condition, without a stump or stone, and bordering upon a stream of water. In the spring of the same year I put upon this field of ten acres forty-one year sheep without lambs. These sheep kept everything down as smooth as a barn floor. The next year I put on the same number and kept them on until time to come to the barn. They were not taken from the field at any time during the season, neither did they have any grain of any kind, but they were in splendid condition. They were grade Merinos.

In the spring of 1867 I noticed that the field looked green the last of April and the first of May, so much so that in consulting with my neighbors I was induced to keep off from it and let it come up to grass for the scythe. The field in the meantime had been sown over with a light dressing of plaster, about one bushel to the acre, and a small quantity of grass seed, timothy and red top. Nothing else has been done to the field in any shape up to the present time.

Now for the result. The first year after taking the sheep off I had the greatest yield of grass that I ever had from any of my fields under other treatment, and of the best quality, a mixture of timothy, red top, white clover and some grass that I cannot name. Hardly a head of white weed was seen on the field, and what was the most remarkable to me and my neighbors is, that the field has continued to produce bountifully up to the present time, which is eight years since the sheep were taken off; and to-day (August 24) the field is tented thick with bunches of the very best hay, averaging over one ton to the acre. I have since sold the field to one of my friends, and asked him if he expected to get another crop from the field without dressing it again. His reply was, "Yes, I expect to get several more yet."

SOIL INEXHAUSTIBLE.—We read and hear a good deal about the inexhaustible fertility of the soil, that the labor of exhausting the fertile prairies of the West is too much like trying to dry the ocean with a spoon, etc. This doctrine may do very well for visionary theorists to teach, but the actual facts stand out in too bold relief to justify any such groundless assumption. The old system of selling everything off the land for other people to convert to their own use has brought State after State into comparative impoverishment, till the soil is spreading to what was once called "the West," for it appears that Ohio is already going down hill at a rapid rate, and other States of the West and Southwest are following in the same track. What else can be expected of a system which exports everything from which is made the strongest and most enduring manures?

The soil of Illinois and other Western States, it is true, is deep and rich, but it is not all on top or near enough the surface to be available to crops; and we already hear from the most reliable sources that the soil of Illinois is giving out most unmistakably; and unless the system that now prevails is changed, the time is rapidly approaching when the lands in that State will also be obliged to succumb to its exhausting effect. It does not require the mental abilities of a soothsayer or a scientist to know that manure must be applied to maintain the fertility of any soil; otherwise continual cropping will soon run it down, despite all the thorough cultivation and deep tillage of a thousand theorists. Now do we need any other constructor than the common law of nature to teach us to take away anything from something lessens the amount, quantity, capacity, force, or any other property of the

HOUSEHOLD HELPS.

YEAST AND HOME-MADE BREAD.—Boil one pound of good flour, a quarter of a pound of moist sugar, and half an ounce of salt, in two gallons of water, for an hour. When nearly cold, bottle and cork it closely. It will be fit for use in twenty-four hours, and one pint will make eighteen pounds of bread.

TO WASH WHITE STRIPED STOCKINGS.—Make a jelly, the night before it is wanted, of the best yellow soap; wash the stockings in warm water with a little salt in it, using the jelly instead of soap; rinse in clear water, with a little salt in it; wring as dry as possible, and dry quickly.

Useful Information.

A GENTLEMAN writes to the Germantown Telegraph: Persons purchasing trees to plant should look close to their feet. They are clean and bright. If they are discolored to any great extent, and show black streaks down from the top, and black in pruning, the probability is that they will be tender and break in two with a little bending, and will be black in the middle. Avoid them; they will not make good, thrifty trees after transplanting.

DR. OLIVER HOLMES, of Drs. Garvin & Co., Chicago, hands us the following directions for disinfecting by an easy and cheap method: One pound of green coppers, dissolved in one quart of water, and poured down a water-closet will effectually destroy the foulest odors. Simple green coppers, dissolved under the bed in any vessel that will hold water, will render a hospital, or other place for the sick, free from unpleasant smells. For butcher's stalls, fish markets, slaughter houses, sinks, and wherever there are offensive, putrid gases, dissolve coppers and sprinkle it about, and in a few days the smells will pass away. If a cat, rat or mouse dies about the house and sends forth an offensive gas, place some dissolved coppers in an open vessel near the place where the nuisance is, and it will soon purify the atmosphere.

The Borden Mutiny.—Readers may remember a narrative which appeared in the columns of the papers a few months ago of a remarkable case of mutiny and piracy on the high seas. A vessel called the "Jefferson Borden" was making a voyage from New Orleans to London, having on board, besides the captain and mates, five sailors and a boy, with the captain's wife as passenger. On the 20th of April, while in mid-ocean, nine hundred miles from England, and three of the sailors mutinied, the first and second mates were both murdered in the night and an attempt made to decoy the captain from the cabin where he was sleeping, which was, however, frustrated by the timely caution of his wife, who had suspected foul play. The captain then armed himself and gave battle to the mutineers. He had for allies one sailor, the steward, his wife and the cabin boy. On the other side were three mutineers. The battle waged with varying fortunes for about forty-eight hours. At last the captain by dint of bravery and skillful tactics succeeded in driving the three men into the fore-cabin, where they finally surrendered, overcome by hunger, fatigue and wounds. The vessel was taken into an English port, and in due time returned to Boston with the mutineers in custody. They were indicted for murder, mutiny and piracy, and a few days ago, after a trial of eight days' duration, were found guilty—two of them of piracy, mutiny and murder, and one of mutiny alone, having joined the others after the mutiny was committed. In the case of the two former there were no extenuating circumstances, and they will undoubtedly be hung. There has not been an execution in Massachusetts for piracy for more than forty years.

THE MASON & HAMLIN ORGAN Co. have obtained another triumph over all their competitors, and won new honors for America. They have just been awarded the grand medal of honor for the best cabinet organ, or parlor organ, at the World's Exposition in London, the capital of Upper Austria.

VICK, in his Floral Guide, mentions the following cheap and easily raised annuals, for blooming in winter in pots, and which may be easily obtained by any one who may not be able to procure costly or rare greenhouse plants: Mignonette, balsam, oenothera, sweet alyssum, stocks, etc.; and any plants growing in the garden which have not bloomed, may be taken up and potted for winter.

We do not puff up everything, but when an article has as much merit as Dobbin's Eucalypti Soap made by Craig & Co., Phila., Pa., we gladly praise it, as does every one who ever tried it. Try it once.

A MAN who puts himself on the ground of mere principle, if the whole world be against him, is mightier than all. Never be afraid of being in the minority, if the minority is based upon sound principles.

PERSONAL.—C. Mendenhall, Sheriff of Cobb Co., "I have used Simmons' Liver Regulator with successful effect in Bilious Colic and Dyspepsia. It is an excellent remedy and a public blessing."

DEATH AND THE SUN have this in common—few can gaze upon them steadily.

FIRST GRAND EXPOSITION OF THE TRADESMAN'S PATENT, Pittsburgh, Pa., opens Oct. 7, closes Nov. 6. Ad. A. J. Nellis, Pres.

OKENFORD.—This great "unknown land" of swamps, islands, lakes, rivers, home of bear, deer and alligator, celebrated refuge of Seminole Indians and source of the Seminole, famous "river of song," will soon be explored by a several months' expedition, fitted up by the Atlanta (Ga.) Confederation, with rich results to science, romance, adventure. This chief political and family journal of the South, also famous for its humor, after the Detroit Free Press and Danbury News, should be in every family in the Union. Daily, six months, \$3.50; by mail, \$4.00. Sent by express, Specimen copy and circular sent free. Address W. A. Hemphill & Co., Atlanta, Ga.

CRAMPS AND PAINS IN THE STOMACH are the result of imperfect digestion, and may be immediately relieved by a dose of J. C. Ayer's Cathartic, with rich results to science, romance, adventure. A teaspoonful in a little sweetened water is a dose.

HEAVY COWS are good for horses; none will deny that, but cats make a horse's head look smooth and glossy when he is out of condition. Sheridan's Candy Condition Powders will do this when all else fails.

MYSTERY SOLVED.—The great secret of the wonderful success of J. C. Ayer's Cathartic, at the root of disease by purifying the blood, restoring the liver and kidneys to healthy action, and invigorating the nervous system.

Dr. T. W. Parkes reduces the most obstinate cases of constipation; cures Piles whether internal or external. They produce no CANCER.

SCIENCE'S PLEURALGIC REMEDY. SCIENCE'S MANTRAP PILES. SCIENCE'S CATARRH. The only medicine that will stop a cough with the death of the patient; they look up the cause of the cough, and in fact, they cure the action of the very system. Cures Croup, Whooping Cough, and all the diseases of the throat, lungs, and chest. Cures the most obstinate cases of Constipation, and all the diseases of the bowels. Cures the most obstinate cases of Dyspepsia and all the diseases of the stomach and liver. Cures the most obstinate cases of Biliousness and all the diseases of the liver and gall bladder. Cures the most obstinate cases of Hemorrhoids and all the diseases of the rectum and anus. Cures the most obstinate cases of Piles and all the diseases of the rectum and anus. Cures the most obstinate cases of Catarrh and all the diseases of the bladder and urethra. Cures the most obstinate cases of Gonorrhea and all the diseases of the bladder and urethra. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoblastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoclastic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteolytic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteonecrosis and all the diseases of the blood. Cures the most obstinate cases of Osteitis and all the diseases of the blood. Cures the most obstinate cases of Osteomyelitis and all the diseases of the blood. Cures the most obstinate cases of Osteosarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteogenic sarcoma and all the diseases of the blood. Cures the most obstinate cases of Osteoid sarcoma and all the diseases of the
